

全国英语等级考试
第三级

PUBLIC ENGLISH TEST SYSTEM (PETS)
LEVEL 3

2025年9月笔试真卷

笔试部分答题时间:120 分钟

姓名_____

准考证号_____

SECTION I Listening

(25 minutes)

Directions:

This section is designed to test your ability to understand spoken English. You will hear a selection of recorded materials and you must answer the questions that accompany them. There are TWO parts in this section, Part A and Part B.

Remember, while you are doing the test, you should first put down your answers in your test booklet. At the end of the listening comprehension section, you will have 3 minutes to transfer your answers from your test booklet onto ANSWER SHEET.

If you have any questions, you may raise your hand now as you will not be allowed to speak once the test has started.

Now look at Part A in your test booklet.

Part A

Directions:

You will hear 10 short dialogues. For each dialogue, there is one question and four possible answers. Choose the correct answer—A, B, C or D, and mark it in your test booklet. You will have 15 seconds to answer the question and you will hear each dialogue only once.

1. What can we know about Tom's flight ?

- | | |
|---------------------|--------------------------|
| [A] He missed it. | [B] It took off at 9:30. |
| [C] It was delayed. | [D] He wouldn't take it. |

2. When does the woman have to turn in the report ?

- | | |
|--------------------|-------------------|
| [A] Next Saturday. | [B] This Saturday |
| [C] Next month. | [D] Next Monday |

3. How long will they wait for Mary in total ?

- | | |
|-----------------|-----------------|
| [A] 10 minutes. | [B] 35 minutes. |
| [C] 45 minutes. | [D] 55 minutes. |

4. Where may the woman sit ?

- | | |
|--------------------|---------------------|
| [A] The first row. | [B] The second row. |
| [C] The third row. | [D] The fourth row. |

5. When will the plane leave ?

- | | |
|-------------------|-------------------|
| [A] At 9:30 p.m. | [B] At 9:45 p.m. |
| [C] At 10:00 p.m. | [D] At 10:15 p.m. |

6. What does the man mean ?

- | | |
|-------------------------------|-----------------------------------|
| [A] He doesn't like swimming. | [B] He would like to go swimming. |
| [C] He is busy. | [D] He dislikes the woman. |

7. When will they meet for the lecture ?

- [A] At 6:00. [B] At 5:00.
[C] At 4:00. [D] At 3:00.

8. What happened to Mr. Black ?

- [A] He is busy. [B] He has fully recovered.
[C] He is ill. [D] He has come back.

9. Where does the conversation most probably take place ?

- [A] At the airport. [B] In a restaurant.
[C] In a hotel. [D] At the station.

10. What does the man suggest the woman do ?

- [A] See a doctor. [B] Have a good rest.
[C] Do exercise. [D] Relax himself.

Part B

Directions:

You will hear four dialogues or monologues. Before listening to each one, you will have 5 seconds to read each of the questions which accompany it. While listening, answer each question by choosing A, B, C or D. After listening, you will have 10 seconds to check your answer to each question. You will hear each piece only once.

Questions 11-13 are based on the following dialogue.

11. Why is the man moving to New York ?

- [A] He likes to live in New York.
[B] He wants to change the work environment.
[C] He has a good friend in New York.
[D] He has found a more suitable job.

12. How old is the man !

- [A] 19 years old. [B] 20 years old.
[C] 26 years old. [D] 39 years old.

13. What does the man plan to do after he retires ?

- [A] Travel around the world. [B] Visit his old friends.
[C] Move to New York. [D] Go back to his hometown.

Questions 14-17 are based on the following dialogue.

14. How can we get enough food if we don't eat animals ?

- [A] Grow more crops. [B] Buy food from others.
[C] Sell the animals to buy crops. [D] Develop new agricultural technologies.

15. Why do some people hunt animals according to the man ?

- [A] Because they want to form a hobby in animal hunting.

- [B] Because they want to hunt them for meat.
 - [C] Because they want to hunt them and sell them.
 - [D] Because they want to hunt them and send them to the zoos.
- 16.What can we learn about animals used in experiments ?
- [A] They are still treated with old techniques nowadays.
 - [B] The number of them being tested is reducing greatly.
 - [C] They are tested on in many ways.
 - [D] They are provided with better living conditions.
- 17.What does the man say about charities that take care of animals ?
- [A] They do a great job in protecting animals.
 - [B] People should give more money to these charities.
 - [C] The number of these charities is falling dramatically.
 - [D] They recreate natural living conditions for animals.

Questions 18-21 are based on the following monologue.

- 18.What can we learn about trees in the desert ?
- [A] They only get moisture from rainfall.
 - [B] They need more moisture than trees elsewhere.
 - [C] They can live a long life without water.
 - [D] They do not need water to ensure their growth.
- 19.What's the symptom when trees look thirsty ?
- [A] Their leaves will turn red.
 - [B] Their branches will break.
 - [C] Their leaves will fall on the ground.
 - [D] Their leaves will hang downwards.
- 20.How should we water a tree after it has grown up ?
- [A] Water it often.
 - [B] Water it deeply.
 - [C] Water it every ten days.
 - [D] Water it only in hot season.
- 21.Why should we stop watering when the soil absorbs the water ?
- [A] To save water.
 - [B] To protect the soil.
 - [C] To establish the roots.
 - [D] To let the water run off the surface.

Questions 22-25 are based on the following monologue.

- 22.What is this passage mainly about ?
- [A] How to remember others' names.
 - [B] How to take care of our body.
 - [C] How to improve our memory.
 - [D] How to take vitamins properly.
- 23.How can we remember a name according to the speaker ?
- [A] Remember the first name first.
 - [B] Remember the family name first.
 - [C] Write it down on a piece of paper.
 - [D] Repeat the name for several times.

24.How often should we have a break according to the speaker ?

- [A] Every 6 minutes. [B] Every 20 minutes.
[C] Every 30 minutes. [D] Every 40 minutes.

25.Why does the speaker suggest we take vitamins ?

- [A] Because they are good for our memory.
[B] Because they don't make the mind dull.
[C] Because it's a suggestion from a famous memory expert.
[D] Because they are good for our physical development.

You now have 3 minutes to transfer all your answers from your test booklet to your ANSWER SHEET.

That is the end of the listening comprehension section.

SECTION II Reading

(50 minutes)

Part A

Directions:

Read the following to texts. Answer the questions on each text by choosing A, B, C or D. Mark your answers on your ANSWER SHEET.

Text 1

When a 13-year-old Virginia girl started sneezing, her parents thought it was merely a cold. But when the sneezes continued for hours, they called in a doctor. Nearly two months later the girl was still sneezing, thousands of times a day, and her case had attracted worldwide attention.

Hundreds of suggestions, ranging from “put a clothes pin on her nose” to “have her stand on her head”poured in. But nothing did any good.Finally, she was taken to Johns Hopkins Hospital where Dr.Leo Kanner, one of the world's top authorities on sneezing, solved the baffling (难以理解的) problem with great speed.

He used neither drugs nor surgery, curiously enough, the clue for the treatment was found in an ancient superstition about the amazing bodily reaction we call the sneeze. It was all in her mind, he said, a view which Aristotle, some 3,000 years earlier, would have agreed with heartily.

Dr.Kanner simply gave a modern psychological interpretation to the ancient belief that too much sneezing was an indication that the spirit was troubled; and he began to treat the girl accordingly.

“Less than two days in a hospital room, a plan for better scholastic and vocational

adjustment, and reassurance about her unreasonable fear of tuberculosis quickly changed her from a sneezer to an ex-sneezer,” he reported.

Sneezing has always been a subject of wonder, awe and puzzlement. Dr.Kanner has collected thousands of superstitions concerning it. The most universal one is the custom of begging for the blessing of God when a person sneezes—a practice Dr.Kanner traces back to the ancient belief that a sneeze was an indication that the sneezer was possessed of an evil spirit. Strangely, people over the world still continue the custom with the traditional,“God bless you” or its equivalent.

When scientists look at the sneeze, they see a remarkable mechanism which, without any conscious help from you, takes on a job that has to be done. When you need to sneeze you sneeze, this being nature's clever way of getting rid of an annoying object from the nose. The object may be just some dust in the nose which nature is striving to remove.

26.The girl sneezed continuously because she_____.

- [A] was ill
- [B] was mentally ill
- [C] had heavy mental burden
- [D] had attracted world-wide attention

27.When the girl began to sneeze continuously, _____.

- [A] a lot of people offered their advice
- [B] she was taken to Johns Hopkins Hospital
- [C] she was given a treatment found in ancient superstition
- [D] many doctors treated her in different ways

28.Dr.Kanner cured the girl by_____.

- [A] using Aristotle's method
- [B] giving her psychological treatment
- [C] practicing superstition
- [D] treating her tuberculosis

29.When a person sneezes, we say “God bless you” because_____.

- [A] it’s a tradition
- [B] the person is possessed of an evil spirit
- [C] the person is ill
- [D] God will bless those who sneeze

30.According to scientists, people sneeze because_____.

- [A] they are ill
- [B] to sneeze is human nature
- [C] they do not need any conscious help
- [D] there are unwanted things in their noses

Text 2

Flying over a desert area in an airplane, two scientists looked down with trained eyes at trees and bushes. After an hour's flight, one of the scientists wrote in his book, “Look here for probable metal.” Scientists in another airplane, flying over a mountain area, sent a message to other scientists on the ground, “Gold possible.” Walking across hilly ground, four scientists reported, “This ground should be searched for metal.” From an airplane over

a hilly wasteland a scientist sent back by radio one word: "Uranium."

None of the scientists had X-ray eyes: they had no magic power of looking down below the earth's surface. They were merely putting to use one of the newest methods of locating minerals in the ground.... trees and plants as signs that certain minerals may lie beneath the ground on which the trees and plants are growing.

This newest method of searching for minerals is based on the fact that minerals deep in the earth may affect the kind of bushes and trees that grow in the surface.

At Watson Bar Greek, a brook (小溪) six thousand feet high in the mountains of British Columbia, Canada, a mineral search group gathered bags of tree seeds.Boxes were filled with small branches from the trees. Roots were dug and put into boxes. Each bag and box was carefully marked. In a scientific laboratory, the parts of the forest trees were burned to ashes and tested.Each small part was examined to learn whether there were minerals in it.

Study of the roots, branches, and seeds showed no silver. But there were small amounts of gold in the roots and a little less gold in the branches and seeds. The seeds growing nearest to the tree trunks had more gold than those growing on the ends of the branches.

31.Scientists were flying over a desert or a hilly wasteland or a mountain area in order to search for _____ in the ground.

- | | |
|-------------|--------------|
| [A] gold | [B] silver |
| [C] uranium | [D] minerals |

32.The study of trees, branches and roots shows that

- [A] there were larger amounts of gold in the branches than in the seeds
[B] there were smaller amounts of gold in the roots than in the branches
[C] there were less amounts of gold in the seeds growing on the ends of branches than seeds growing nearest to the tree trunks
[D] there was more gold in the branches than in the roots

33.Which is the best title suggested below ?

- [A] Scientists Searching for Metals with Special Power
[B] New Methods of Searching for Minerals
[C] Gold Could Be Found by Trees and Plants
[D] A New Method of Searching for Minerals—Using Trees and Plants

34.Which of the following is NOT mentioned as part of a tree that can help find minerals ?

- | | |
|---------------|------------|
| [A] Leaves. | [B] Roots. |
| [C] Branches. | [D] Seeds. |

35.The scientists were searching for minerals by using

- | | |
|--------------------------|------------------|
| [A] X-ray | [B] magic power |
| [C] a special instrument | [D] trained eyes |

Part B

Directions:

Read the texts from a magazine article in which five people gave their opinions on work and family. For questions 36-40, match the name of the persons to one of the statements (A-G) given below. Mark your answers on ANSWER SHEET.

Liu:

To me, work is first and my child is second. I work more for myself than for my child because it's the only way to be economically independent. Otherwise, I may some day lose everything, even my child.

I can give for the sake of my daughter but never at the cost of my career. Only after I achieve value through work can it be possible for me to raise my baby.

I resumed working after a short maternity (产妇的) leave. Now my daughter goes to kindergarten while I am at work; I think that is her first step into society.

Liang:

Nowadays, economic independence is particularly important to women. The only way to realize self-value is through work. I believe women should first live as a social entity (实体), then as a mother. And there are facts to show that women are not inferior to men in the working world.

Child is just another part of my life, it would be impossible to make her my whole life. I think I will also get a nanny (保姆) to lend me a hand.

Yao:

When women make their career as their final pursuit, I think they lose their natural maternal instincts. I hope my wife will put most of her energy and time on child care and family. Because she gives birth to the child, she can do a much better job than the father in understanding the child. The mother should be the main educator while father works as her assistant.

Wang:

Women are naturally fit for human reproduction while men are meant for material production. Married women must assume the role of full-time mothers if their financial situation permits it; and a woman's value is only realized after she has successfully raised her child.

Zhao:

Although we may say women's talents lie in being mothers, we should admit that women do not sacrifice their families for work and they are not expected to give up a chance for a career. Both parents need to balance the responsibilities of family and work. After all women are equal members of society and have value in all social fields.

Now match the name of each person (36-40) to the appropriate statement.

Note: there are two extra statements.

Statements

- | | |
|----------|---|
| 36.Liu | [A] My child is the focus of my life. |
| 37.Liang | [B] Family and work are both important for women. |
| 38.Yao | [C] Men should be asked to return to their paternal duties. |
| 39.Wang | [D] I would give up the whole world for my work. |
| 40.Zhao | [E] Women need work to prove their own value. |
| | [F] Women are born to be mothers. |
| | [G] Women understand child better than men. |

Part C

Directions:

Read the following text from which five sentences have been removed. Choose from the sentences A-G the most suitable one to fill each numbered gap in the text (41-45). There are TWO extra sentences that you do not need to use. Mark your answers on your ANSWER

Sugar cane was once a wild grass that grew in New Guinea and was used by local people for roofing their houses and fencing their gardens. Gradually a different variety evolved which contained sucrose (蔗糖) and was chewed on for its sweet taste. Over time, sugar cane became a highly valuable commercial plant, grown throughout the world. 41

Sugar became a vital ingredient in all kinds of things, from confectionery (糖果点心) to medicine, and, as the demand for sugar grew, the industry became larger and more profitable. 42 Many crops withered (枯萎) and died, despite growers' attempts to save them, and there were fears that the health of the plant would continue to deteriorate.

In the 1960s, scientists working in Barbados looked for ways to make the commercial species stronger and more able to resist disease. They experimented with breeding programmes, mixing genes from the wild species of sugar cane, which tends to be tougher, with genes from the more delicate, commercial type. 43 This sugar cane is not yet ready to be sold commercially, but when this happens, it is expected to be incredibly profitable for the industry.

44 Brazil, which produces one quarter of the world's sugar, has coordinated an international project under Professor Paulo Arrudo of the Universidade Estadual de Campinas in Sao Paulo. Teams of experts have worked with him to discover more about which parts of the genetic structure of the plant are important for the production of sugar and its overall health.

Despite all the research, however, we still do not fully understand how the genes function in sugar cane. 45 This gene is particularly exciting because it makes the plant resistant to rust, a disease which probably originated in India, but is now capable of

infecting sugar cane across the world. Scientists believe they will eventually be able to grow a plant which cannot be destroyed by rust.

[A] Unfortunately, however, the plant started to become weaker and more prone to disease.

[B] Sugar cane was now much vigorous and the supply of sugar is therefore more guaranteed

[C] One major gene has been identified by Dr Angelique D'Hont and her team in Montpellier, France.

[D] The majority of the world's sugar now comes from this particular commercial species.

[E] Since the 1960s,scientists have been analysing the mysteries of the sugar cane's genetic code.

[F] The sugar cane's genetic code has been found by a farmer in 1950.

[G] Eventually, a commercial plant was developed which was 5 percent sweeter than before, but also much stronger and less likely to die from disease.

Part D

Directions:

Read the following text from which 10 words have been removed. Choose from the words A - O the most suitable one to fill each numbered gap in the text (46 - 55). There are FIVE extra words that you do not need to use. Mark your answers on your ANSWER SHEET.

Health is the cornerstone of a fulfilling life, and _____ 46 _____ healthy habits is essential for long-term well-being. Regular exercise plays a vital role in maintaining physical fitness. Engaging in activities like jogging, cycling, or swimming for at least 30 minutes daily can boost energy, strengthen immunity, and _____ 47 _____ the risk of chronic diseases. Additionally, a balanced diet is crucial. Consuming plenty of fresh fruits, vegetables, and whole grains while limiting sugary and processed foods ensures adequate nutrition. _____ 48 _____ sleep is often overlooked but equally important; adults should aim for 7-8 hours of quality sleep each night to improve _____ 49 _____ and mood.

Stress _____ 50 _____ is another key aspect. Practicing relaxation techniques such as deep breathing, meditation, or hobbies _____ 51 _____ reading and gardening can help alleviate pressure. Avoiding harmful habits like _____ 52 _____ and excessive alcohol intake is imperative, as these pose significant risks to both physical and mental health. Building strong social connections also contributes to happiness. Spending time with family and friends, joining in community activities, or volunteering can enhance emotional health.

Small, consistent changes in daily routines make a big _____ 53 _____. Start _____ 54 _____ setting achievable goals, such as _____ 55 _____ sugary snacks with healthier options or adding a short walk to your daily schedule. Remember, investing in health today paves the way for a vibrant future. Act now to embrace a healthier lifestyle!

- | | |
|-------------------|----------------|
| [A] against | [B] replacing |
| [C] test | [D] by |
| [E] sufficient | [F] like |
| [G] poor | [H] reduce |
| [I] adopting | [J] management |
| [K] concentration | [L] promote |
| [M] difference | [N] smoking |
| [O] available | |

SECTION III Writing

(45 minutes)

Directions:

You should write your responses to both Part A and Part B of this section on ANSWER SHEET.

Part A

56. Write a notice to your neighbours about a community donation drive you are organising. Your community has many foreign residents. In your notice, state

- 1) the purpose of the event,
- 2) the time and place,
- 3) the types of items that can be donated.

You should write about 100 words. Do not sign your own name at the end of your letter. Use "Li Ming" instead. You don't need to write the address.

Part B

57.

Directions:

Read the text below. Write an essay in about 120 words, in which you should summarize the key points of the text and make comments on them. Try to use your own words.

British youth Joe Kolnick transformed a 1930s town hall in his hometown into one of the world's rare film-only cinemas while preparing for exams. Through donating equipment, he restored traditional projection technology, attracting nostalgic middle-aged and elderly audiences as well as younger viewers seeking unique experiences. The cinema retains retro details like smoke machines, old-fashioned trailers, and intermissions, creating a cultural landmark that resists the industrialization of modern multiplex cinemas. Kolnick believes the color and texture of film are irreplaceable by digital technology, a view shared by directors like Christopher Nolan.
